

	Miracle Grow–Leon White		
sculpture 14	Medium–Painted steel	 	\$6,500
	White uses movement, simplified shapes, primary colors, and a larger-than-life size in this fun garden plant. He is trying to make viewers feel joy, delight, and whimsy when looking at his piece. How do you feel about this giant plant sculpture? Do the colors make a difference to how you feel? Imagine how you would feel about it if it were painted brown and black. What about the size of the piece? Would you like it better if it were ordinary plant size? Imagine if it were the size of a house. Would you feel like a little bug in a garden?
